Frameworks & Libraries: React.js,Nodejs+ [Express.js](#), Redux , jQuery, Flask, Jest

CMS: WordPress

Databases: MySQL, SQLite, MongoDB

Tools & Platforms: Git, GitHub, Postman, Canva

Concepts: REST APIs, JWT, MVC Architecture , OOP, Responsive Design, Accessibility

Projects

Website Development- Financial Tracker App

Aug 2026- Sept 2026

Full-stack MERN application for personal finance management. Implemented JWT-based user authentication with email confirmation (via Resend), full CRUD functionality for financial transactions, and interactive data visualizations using Recharts (bar charts) to summarize spending. Built with React, Node.js/Express, and MongoDB, and deployed across Vercel (frontend), Render (backend), and MongoDB Atlas (database).

Tool Stack: React JS, Node JS+Express JS, Bootstrap, JWT, bcrypt, Resend, MongoDB, Redux and REST API.

Website Development- Not To Do List

Aug 2026- Aug 2026

Time management web app that helps users track how their week is actually spent. Users log daily activities with time durations across the full week and categorize them into productive entries and a "bad list" of time-wasting activities. Includes a sorting feature to surface the bad list and calculate total hours wasted per week, helping users identify and cut unproductive habits.

Tool Stack: React JS, Node JS+Express JS, Bootstrap, MongoDB and REST API.

Website Development- The Movie World

July 2026- Aug 2026

Movie search app with a persistent personal watchlist, letting users save favorites and pick up where they left off.

Tool Stack: React JS, Bootstrap, CSS, HTML, Javascript and API.

Website Development- WordPress Project

Nov 2015- Dec 2015

Developed a responsive WordPress business website using the Hello Elementor theme, featuring a clean, user-friendly design, responsive layouts, contact form integration, testimonial slider, and optimized navigation

Tool Stack: WordPress, Hello Elementor Theme, Elementor Page Builder, Contact Form Plugin, Testimonial Slider Plugin.
